3.

I clicked submit without putting in the actual price. It needs to shoot out an error message and not be saying please wait especially with the absence of values entered for the Actual cost.

Cost AED11,874.00

				Total Cost : 2132		Total Actual Cost : 0		Deviation : 0	

4. Comment

So i logged in as Finance

added actual cost, clicked on submit and the page loaded without actual cost. (not the above image)

added actual cost and clicked on submit and the job appeared as submitted. opened the job and we have the image above. the actual cost is not there. without the deviation too.

and the submit and update options are not available in this new updated and submitted form.

5. Why do we have to add salesperson separately from the users under sales? I feel users under sales have to be automatically added to sales persons.

6. As project manager, I can't view or update jobs. It gives a 403 message.

7.
